Multiplier Event from HMKU

Dear Reader,

Yasemin Karaaslan, one of the partners of the project called Clinical Key for Electrical Stimulation in Physiotherapy and Rehabilitation, carried out the first multiplier activity on 05.07.2024 at Hatay Mustafa Kemal University, Faculty of Health Sciences, Department of Physiotherapy and Rehabilitation. A total of 21 physiotherapists attended this event. Signatures of the participants were collected. In addition, satisfaction surveys were completed by the physiotherapists at the end of the event. The results of these surveys were quite positive. They stated that the materials prepared for the project were useful, expectations regarding the meeting were met, and they were satisfied with the outcome of the meeting. These physiotherapists were also given various gifts (such as mugs, notebooks, pens, files).

Only 2 people criticized the fact that the certificate was given even if a certain score was not obtained from the quiz. Some participants questioned whether the information in the prepared documents had been reviewed by others. Regarding this issue, it was stated that all documents were already prepared by experts in the field.

Below you will find the invitation to participate in this event, the signature list, and various photographs.
